

SUNDSTROM SR100 SILICON HALF MASK - MEDIUM / LARGE

\$112.84

Description

The SR100 half mask is made of silicone in three sizes, i.e. **S/M**, **M/L** and **L/XL**. The mask is equipped with two exhalation valves, which ensures very low exhalation resistance.. The valve covers with partitions effectively protect the exhalation membrane against dust and paint mist. The easily adjustable elastic head harness straps of the mask are designed as a V-shaped loop and have a large dished crown plate, which contributes towards a comfortable and safe fit. The mask is used either as a filtering device in combination with filters from the Sundström range, or in combination with the SR 307 compressed air attachment which then serves as a breathing apparatus with continuous flow for connection to a compressed air supply. **Key Features**

- Low allergenic, superior facial seal
- Deep chin cup and broad nose rim
- Two exhalation valves
- New valve caps with air diffusion (no clogging during spray jobs)
- Continuous head strap
- Can easily be fitted with optional SmallTalk microphone and loudspeaker
- Accepts all Sundstrom filters and compressed air attachments
- Heavy-duty use, full time exposure, long-term work
- Filters not Included
